Intelligent structural waterproofing with a system

**The Multiple Pipe Drain with
Full-Surface Bitumized Flange**

Multi-T

www.diboFLEX.com

The All-New Multiple Pipe Drain **MULTI-T** is based on the patented **T-Series** from **diboFLEX**. It can be **embed in concrete** and **directly welded to bitumenous membranes**. This application guarantees **highest tightness**. Bitumen dick coat (1K/2K) may be alternatively used for basement exterior walls. There are **high cost savings** throughout the whole assembly and construction process.

Therefore, the Multiple Pipe Drain **MULTI-T** from **diboFLEX** is the logical expansion of the product portfolio. It is available from **2 to 5** connected pipe drains that may be embed in concrete and directly welded to bitumenous membranes as a single piece. The **MULTI-T** offers both: **a fast and an exact installation** of a standardized product.

Advantages

- Innovative Multiple Pipe penetration for the **universal use** (sewage, media lines etc) with **integrated bituminous flange**
- Standardization: **one solution for floor plate, basement exterior wall & roof**
- Flexibility, parts-reduction, **simplification of the assembly & construction process**
- **Spacer** made of Polystyrol for the creation of room connection pipes after concreting
- **Integration of almost any sealing insert** (e.g. for cables) is possible
- **DN100 and DN 150, Lengths: 250 and 300mm**
- Applicable as **vapor barrier** on roofs
- **Cost saving solution** for the entire sealing process
- **Pressure checked (1 bar) and RADON gas tested**

Without **diboFLEX**

With **diboFLEX**

TYPES	DN 100	DN 150	DN 150-300
	2T 100	2T 150	2T 150-300
	3T 100	3T 150	3T 150-300
	4T 100	4T 150	4T 150-300
	5T 100	5T 150	5T 150-300
